SUMMARY

Penetration Tester with knowledge of web, mobile, and network security testing, and Active Directory assessments. Skilled in vulnerability identification, security testing methodologies, and penetration testing tools. Focused on identifying security weaknesses and assessing risks across diverse environments.

EDUCATION

Bachelor of Computer and Control Engineering 2023 – 2028
Higher Institute of Engineering and Technology, Kafr El-Sheikh Kafr El-Sheikh

COURSES

Penetration Testing Training – Digital Egypt Pioneers Initiative (DEPI) 07/2026 – 12/2026
Completed specialized training in penetration testing, covering web application, mobile application, and network security testing, along with Active Directory security assessment. Gained practical experience with penetration testing tools, vulnerability identification, security assessment methodologies, and analyzing security weaknesses across different environments. Global Knowledge

CCNA Training – NTI (National Telecommunication Institute) 01/2026 – 04/2026
Completed comprehensive training in networking fundamentals including OSI and TCP/ IP models, IP addressing and subnetting, VLANs, routing protocols, NAT, ACLs, and network troubleshooting. Gained hands-on experience using Cisco Packet Tracer for configuring and simulating network topologies. Online

Full Stack Web Development Using .NET – ITI 02/2025 – 06/2025
Completed training in full-stack web development using C#, ASP.NET Core MVC, Web API, Entity Framework Core, and SQL Server. Gained practical experience in database design, backend development, frontend technologies, and building responsive web applications. Online

Web Application Security Training – TIPS Hindawi 08/2026 – 11/2026
Studied web application security fundamentals, common web vulnerabilities, and penetration testing methodologies for identifying and assessing security weaknesses in web applications. Online

PROJECTS

Web Application Penetration Testing – TIPS Hindaw 10/2026 – 10/2026
Conducted a security assessment of a deliberately vulnerable web application, identifying and analyzing web security vulnerabilities through practical penetration testing techniques.

CVE-Scanner | Automated Reconnaissance & Vulnerability Assessment Tool 10/2026 – 12/2026
Developed a security assessment tool that automates subdomain discovery and reconnaissance, identifies website technologies, and analyzes web pages to assess potential CVE exposure based on detected technologies, versions, and multiple vulnerability-matching factors.

SKILLS

Web Application Penetration Testing
Burp Suite
Vulnerability Assessment
SQL Injection & XSS
Windows Server Fundamentals
Teamwork and Communication Skills
Android Application Security Testing
PowerShell Fundamentals
OWASP Top 10
Nmap
Subdomain Enumeration & Reconnaissance
CVE Research & Vulnerability Analysis
Problem Solving & Analytical Thinking
Network Scanning
Kali Linux
Network Penetration Testing
